

Massachusetts Learner's Permit Test Simulation

A web-based simulation of the Massachusetts Registry of Motor Vehicles (RMV) Learner's Permit written test.

Features

- **25 Multiple-Choice Questions:** Randomly selected from a pool covering key topics
- **Timer:** 25-minute time limit matching the actual test
- **Pass/Fail Results:** Must answer 18+ questions correctly to pass
- **Responsive Design:** Works on desktop and mobile devices
- **Navigation:** Previous/Next buttons to review questions
- **Official Styling:** Interface modeled after Massachusetts RMV design

Topics Covered

- License Requirements
- Learner's Permit Rules
- Rules of the Road
- Traffic Signals
- Parking Regulations
- Alcohol Misuse
- Distracted Driving
- Highway Driving
- Weather Conditions
- Road Markings and Signs
- Emergency Situations
- Junior Operator License

How to Run

1. Ensure you have Python installed
2. Navigate to the project directory
3. Run: `python -m http.server 8000`
4. Open your browser to `http://localhost:8000`

Files

- `index.html` - Main HTML structure
- `styles.css` - CSS styling with RMV-inspired design
- `script.js` - JavaScript logic for test functionality
- `Manual.txt` - Massachusetts Driver's Manual (source material)

Test Requirements

- 25 questions total

- 18 correct answers required to pass
- 25-minute time limit
- Multiple choice format
- Covers Massachusetts-specific driving laws and regulations

Disclaimer

This is a simulation for educational purposes only. It is not the official RMV test. For actual licensing requirements, visit the Massachusetts RMV website.
